

# PLASTIFLOOR®

Let it cure fast with our resins

Sign Up!

## TRAINING DAY INVITATION!

Join us for a day in our headquarters for a theoretical and practical training prepared for flooring installers, contractors, importers, engineers, architects and all flooring enthusiasts.

Our goal is to share our expertise and knowledge about properties of our MMA and PUMMA products and systems.

## Content of our Workshops

1. Prevent the damages of the flooring
2. Learn how to prepare the substrate
3. The advantages of acrylate resins
4. Explore our solutions - Product lines and Systems
5. Get your hands on processing our resins
6. Apply all the system layers with our resins
7. Discuss all your questions

## Application Areas

- Food Processing Industry
- Warehouses
- Freezers/Coolers
- Pharmaceutical Industry
- Parking Decks
- Bridges

# PLASTIFLOOR® TRAINING

*Sign Up for upcoming dates or schedule your own appointment!*

Become a certified installer of Plastifloor® coatings. Application of acrylic resins requires certain skills and knowledge about the processing of the resins, conditions of the substrate and methods of installing.

Our coatings are certified by numerous institutions declaring the best performance. Plastifloor® systems **slippery resistance** range between **R9-R13** grades, mechanical resistance resulted in bonding strength test, abrasion test and impact resistance excellently and we grant food industry flooring certificate approved by **ISEGA**.
